

RSC-DT (Display Terminal)

- o 32 Character LCD Display
- o 16 Position Keypad
- o 2-wire 485
- o Card Reader Port
- o Backlit Display and Keypad

Display Information at your fingertips with the RSC-DT Display Terminal. The RSC-DT combines an integrated 32 character LCD display, a 16 position keypad and a reader port into a single, highly functional package, with a 2-wire RS-485 port for direct connection to the access control system.

The display is a backlit LCD, providing a clear view of system information even in challenging conditions. The keypad provides the standard numeric keys along with 4 function keys that can be used to select options from the display. The reader port supports magnetic stripe, Wiegand, and proximity readers.

12Vdc power is required. All signal lines are protected from Electrostatic Discharge (ESD). Configuration is set via the keypad using menus. The firmware is FLASH based and field upgradeable.
