

Securing Transportation

The challenge of securing transportation facilities is increasing every day. That's why Open Options has developed an ever-growing product line that molds to the changing needs of the transportation industry. NPower DNA, our IP-based Access Control system, easily integrates with IP Video and traditional CCTV systems as well as Analytics. Our Compliance Manager add-on allows you to capture and report on reasons an employee is entering a secured area prior to granting access. Visit us this year at ISC West in Las Vegas to find out why Open Options is the fastest growing provider of security solutions for the transportation industry.
